

Construction Update

Research Belton Hospital, a part of HCA Midwest Health System, Kansas City's largest healthcare network, broke ground in late summer for a 82,000-square-foot, \$39.1 million expansion and renovation project. The expansion is the hospital's response to its communities growing healthcare needs due to the sustained growth in Cass County and southern Jackson County.

Coming Fall 2012 The New Research Belton Hospital

Research Belton Hospital, a part of HCA Midwest Health System, Kansas City's largest healthcare network, broke ground in late summer for a 82,000-square-foot, \$39.1 million expansion and renovation project. The expansion is the hospital's response to its communities growing healthcare needs due to the sustained growth in Cass County and southern Jackson County. In addition, Research Belton Hospital was recently named one of the nation's top performing hospitals on key quality measures by the Joint Commission, the nation's leading accreditor of healthcare organizations.

Todd Krass, CEO of the hospital says, "I find it is of great importance to keep our community updated on the progress of our expansion and renovation project. JE Dunn, the general contractor for the project, advises the hospital management team weekly and states we are currently on target for the current phase of the project. I would also like to let our community know that our full-service hospital and emergency department are still open during construction, and we will continue to provide healthcare to our community 24/7 throughout this project."

Overview of New Emergency Department

- The size of the department will increase from 3,900 square feet to 11,000 square feet, improving our capabilities to better serve our community
- X-ray services and equipment will be added in the Emergency Department
- 15 total private emergency rooms
- Capability to diagnose and treat trauma
- Emergency room patient/family waiting room to accommodate approximately 40 people
- Enlarged helipad

Current Construction Status of our New Emergency Department

- Temporary ambulance off loading areas built on the west side of the hospital
- Old emergency off-loading and garage, parking lot and helipad have been demolished
- Site prep work has started for the new Emergency Department
- New Emergency Department parking area for ambulances and patients near temporary entrance has been built
- New helipad built on the north side of the hospital

Only HCA Midwest Health System hospitals earned national "Top Performer" in all of Kansas City.
